...By Increased Winter Employment

You help yourself and your community when you schedule improvements to your home or place of business for the winter months. You usually get good service, and reasonable prices when you have such work as repairs to cars, outboard motors, household appliances and lawn and garden equipment, done during the winter.

You will also find that winter is a good time for the installation, inspection or repair of plumbing

or electrical and air conditioning systems.

You can enjoy the sunny days of spring and summer when all your maintenance and repair jobs are taken care of in the winter months.

The winter activity so created will help level out Canada's employment picture on a yearly basis by taking the strain off the labour force in the busy spring, summer and fall seasons. This will contribute to the stabilization of our economy.

**SUSTAINED EMPLOYMENT BENEFITS YOU AND YOUR COMMUNITY,
BECAUSE WHEN EVERYBODY WORKS, EVERYBODY BENEFITS.**
